DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 6-8 and 17-19, filed February 21, 2006, with respect to claims 23-25, 27-31, 34 and 35 have been fully considered and are persuasive. The claim rejection under 35 U.S.C. 103 (a) of claims 23-25, 27-31, 34 and 35 has been withdrawn.

Allowable Subject Matter

2. Claims 23-25, 27-31, 34 and 35 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a semiconductor device comprising a semiconductor layer formed on an insulating layer and a metal layer formed at least in an exposed portion of an extension region arranged in the semiconductor layer on both sides of a gate conductor, the metal layer contacting the semiconductor layer and the exposed portion of the extension region (claim 23).

Furthermore, the prior art fails to disclose an IC disposed on an SOI substrate including extension regions provided under and contacting first and second sidewall spacers, the extension regions contacting a gate and extending further under the gate than source and drain diffusion and a conductor formed at least in an exposed portion of the extension region, the conductor being in contact with the exposed portion of the extension region, and at least a portion of the source diffusion region to form a Schottky diode (claim 34). The above limitations in combination with other claim limitations are not taught or fairly suggested by the prior art nor would it be obvious to modify the references of record so as to yield the device of the instant application.
